

ChemHub is dedicated CRO and CMO that researches a wide range of custom chemical challenges and produces for **pheromones & semiochemicals, flavor & fragrance, specialty** and **pharmaceutical** industry sectors. Recently, ChemHub also demonstrated production capability for **OLED** material. ChemHub has the ability to undertake both small and commercial scale chemical productions.

The ChemHub team has combined organic chemistry expertise spanning 100 years with high level training and doctoral qualifications. Our goal is to provide the best service in a timely manner, within our clients' budget and intellectual property protection.

Our experience and understanding help us to make difficult and complex chemicals a much more pleasant and productive process.
